Anymix Pro Anymix is the perfect solution for an easy, yet precise creation of surround mixes. It offers a wealth of features for individual panning and high-quality upmixing. The plug-in comes with a broad selection of up- and downmix preferences tailored to be used in post-production, broadcast, music and game sound design. Anymix doesn't only redistribute audio material to a certain output configuration, but gives you full control over important parameters, turning the mono or stereo mix into an ultra-realistic surround scenario. The plug-in can be used to convert any input setup from mono to 8.1 to any output format from stereo to 8.1. In addition, the included surround panning mode offers deep control of channel positioning within the surround field. Whether it is static panning, an individual motion automation or pure upmix processing – Anymix is the ideal tool. Supports AAX in both 64-bit and 32-bit versions for Avid Pro Tools 10.3.6 or higher. RTAS is also available as 32-bit only. Also supports 32/64 bit VST host applications.
